DETAILED ACTION

Notice of Amendment

In response to the amendment filed on June 29, 2006, all current rejections of the claims are *withdrawn*. The following new grounds of rejection are set forth:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-6 are rejected under 35 U.S.C. 102(a) as being anticipated by U.S.

Patent No 6,352,503 to Matsui et al.

In regards to claims 1-4, Matsui et al. disclose an endoscope apparatus comprising: an observation optical system which is arranged to an inserting portion 7 (see Col. 5, Lines 23-25 and Col. 11, Lines 57-59); a first treatment-tool oscillating base 2 which guides, in a first direction, a first treatment-tool guided via a first channel 23 arranged to the inserting portion; and a second treatment-tool oscillating base which guides, in a second direction, a second treatment-tool guided via a second channel arranged to the inserting portion, wherein the end of at least one of the first and second treatment-tools guided by the first and second treatment-tool oscillating bases is guided to the outside of a field of view from the inside of an endoscope image based on an optical image obtained by the observation optical system (see Fig. 1 and 8-10).

In regards to claims 5-6, Matsui et al. disclose an endoscope apparatus, wherein the edge of the first treatment-tool is guided to the outside of the field of view from the inside, toward substantially a vertical direction of a screen of the endoscope image, and the edge of the second treatment-tool is guided within the field of view, toward substantially a horizontal direction of the screen of the endoscope image and wherein the outside of the field of view is one in the top direction of the screen of the endoscope image (see Figs 1 and 12).

Allowable Subject Matter

Claims 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.
